RECOMMENDATION

INTRODUCTION

Uber is a global mobility platform powered by technology that links drivers and passengers via an easy-to-use mobile app. Instant ride bookings, real-time tracking, transparent pricing, and a seamless travel experience are all made possible by its design, which aims to make transportation accessible, economical, and effective.

Uber remains capable of operating on a huge worldwide scale thanks to real-time data and sophisticated analytics. With **171 million** monthly active platform consumers (**MAPCs**) in **Q4 2024**, the company completed about **11.27 billion trips** globally in 2024, a **14% increase** from the previous year. Also, driver and courier **earnings** reached **US\$20 billion**, demonstrating the platform's high level of marketplace activity. It operates in approximately **70 countries** and **15,000 cities** worldwide and heavily relies on data analytics for demand forecasting, dynamic pricing, route optimization, real-time marketplace matching, and safety, as these metrics demonstrate.

UBER ANALYSIS

PROJECT OBJECTIVE

Uber

The dashboard seeks to offer thorough real-time tracking and analysis of Uber's business activities through:

- Monitoring key performance indicators (KPIs) like revenue, customer trends, driver performance, location and total rides
- Making data-driven decisions possible by visualizing revenue streams, booking trends, and operational metrics
- Tracking completed, cancelled, and incomplete rides to keep an eye on the health of the business
- Examining consumer behavior, such as payment choices, ratings, and reasons for cancellation
- Analyzing insights into popular locations, peak hours, and vehicle performance to optimize operations
- Identifying temporal patterns and month-over-month growth analysis to identify trends

MY ROLE

In my role as a data analyst for this Uber Business Intelligence project, I have complete control over the data lifecycle, from comprehending the data to providing dashboards with actionable insights. In addition to conducting exploratory analysis and creating a multi-page Power BI report that highlights ride trends, customer behavior, business performance, and operational challenges, my responsibilities included cleaning, transforming, and modeling the dataset.

DATA PROCESSING

Uber

Data Collection → Data Cleaning → Data Preparation (Transformation + Reduction)

DATA COLLECTION

Key steps :

Unprocessed data of UBER
raw file containing
booking id, date ,time etc.
various parameters

Source :

Google Drive

DATA CLEANING

Key steps :

Eliminate null values and
duplicates.
Fix errors and inconsistencies
Standardize the formats for
dates, currencies, and locations.

Tools use :

MS Excel, Power BI

DATA PREPARATION

Key steps :

Create calculated
fields, Normalize vehicle types
& payment methods, Establish
relationships between tables
etc

Visualization :

Variety of Data Visuals

RAW DATA

Aspect	Details
Data Source	Collected from ride-level operational datasets
Data Type	Combination of transactional data (rides), categorical data (vehicle type, payment method), numerical data (revenue, distance), and behavioral data (ratings, cancellations).
Data Volume	Includes multiple months of booking activity with thousands of records measuring rides, revenue, and customer behavior.
Key Fields	Booking ID, Customer ID, Driver ID, Vehicle Type, Pickup & Drop Location, Ride Status, Distance, Amount Paid, Rating, Payment Method, Date & Time.

Aspect	Details
Data Quality Checks	Missing values (e.g., ride status, ratings), duplicate bookings, invalid distances, incorrect timestamps, negative revenue, inconsistencies in vehicle type or location names
Initial Observations	Some rides missing ratings, inconsistent formatting in location names, higher cancellations in specific time slots, revenue variations across vehicle types.
Business Use Cases	Analyze revenue trends, vehicle-wise performance, customer behavior, high-demand locations, peak-hour planning, improve rider & driver satisfaction.

INSIGHTS

1. PERFORMANCE OF OPERATIONS

- **HIGH RATE OF COMPLETION** STRONG OPERATIONAL RELIABILITY IS INDICATED BY 93K COMPLETED BOOKINGS WITH 100% COMPLETION ACROSS VEHICLE TYPES.
- **CONSIDERABLE LOSSES:** A SIGNIFICANT REVENUE LEAK IS REPRESENTED BY 57K LOST BOOKINGS, OR ABOUT 38% OF POTENTIAL BUSINESS.
- **CONCERNING CANCELLATIONS:** 37K CANCELED RIDES INDICATE PROBLEMS WITH OPERATIONS OR CUSTOMER SERVICE THAT NEED TO BE FIXED RIGHT AWAY.

2. REVENUE PATTERNS

- **TOTAL REVENUE:** 52M GENERATED WITH AN AVERAGE FARE OF 345.64 PER TRIP
- **PAYMENT PREFERENCE:** UPI DOMINATES WITH 23M (44% OF REVENUE), FOLLOWED BY CASH (13M) AND UBER WALLET (6M)
- **REVENUE VOLATILITY:** MONTHLY REVENUE FLUCTUATES BETWEEN 4.19M AND 4.42M, WITH NOTABLE DIPS IN FEBRUARY AND AUGUST
- **VEHICLE REVENUE:** AUTO GENERATES HIGHEST REVENUE (13M), FOLLOWED BY BIKE (11M) AND GO MINI/SEDAN

INSIGHTS

3. PATTERNS OF DEMAND

- **PEAK HOURS:** ON WEEKDAYS, THE EVENING TIME SLOT (6 PM TO 9 PM) CONSISTENTLY EXHIBITS THE HIGHEST DEMAND (4,500–4,800 RIDES).
- **MODERATE MORNINGS:** 2,300–2,400 RIDES ON AVERAGE DURING THE 6–9 AM WINDOW
- **WEEKLY REGULARITY:** THROUGHOUT THE WEEK, DEMAND IS COMPARATIVELY CONSTANT WITH ONLY MINOR FLUCTUATIONS.
- **TRENDS BY SEASON:** THE DISTANCE TRAVELED FELL PRECIPITOUSLY IN FEBRUARY (197K) AFTER PEAKING IN JANUARY (232K).

GEOGRAPHICAL PERSPECTIVES

- **TOP PICKUP LOCATIONS:** THE MAIN DEMAND CENTERS ARE SAKET (931), FOLLOWED BY BARAKHAMB (846) AND KHANDSA (849).
- **TOP DROP LOCATIONS** INCLUDE LOK KALYA (916), ASHRAM (836), AND BASAI DHA (917).
- **DIFFERENT PATTERNS:** THE LOCATIONS OF PICKUP AND DROP-OFF SHOW THE DIRECTIONAL FLOW PATTERNS OF CITY TRAVEL.

INSIGHTS

5. CUSTOMERS' BEHAVIOR

- **104K ACTIVE CUSTOMERS** WITH RATING EXTREMES (5.00 MAX, 3.00 MIN) MAKE UP THE CUSTOMER BASE.
- **SCORES FOR SATISFACTION:** THE FACT THAT THE CUSTOMER RATING (4.40) IS HIGHER THAN THE DRIVER RATING (4.23) INDICATES THAT THE DRIVER'S PERFORMANCE MAY REQUIRE IMPROVEMENT.
- **CLIENT SEGMENTS:** ALTHOUGH REGULAR RIDERS PREDOMINATE, THERE ARE SIGNIFICANT OPPORTUNITIES FOR NEW CLIENTS AS WELL AS RETURNING ONES.
- **REASONS FOR CANCELLATION:** THE TWO MAIN CAUSES OF CANCELLATIONS ARE BLANK ENTRIES (29,942) AND CUSTOMER-RELATED ISSUES (6,835).

6. VEHICLE PERFORMANCE

- **AUTO DOMINANCE:** AUTOS LEAD IN BOOKINGS (23,128), REVENUE (12.8M), AND DISTANCE (0.63M)
- **BIKE POPULARITY:** SECOND HIGHEST WITH 20,560 COMPLETED BOOKINGS AND 11.4M REVENUE
- **PREMIUM UNDERUTILIZATION:** PREMIER SEDAN AND UBER XL SHOW SIGNIFICANTLY LOWER USAGE DESPITE AVAILABILITY
- **DISTANCE EFFICIENCY:** AUTO AND BIKE HANDLE SHORTER TRIPS EFFICIENTLY WHILE GO SEDAN COVERS LONGER DISTANCES (0.43M)

INSIGHTS

7. TRENDS IN GROWTH

- **GROWTH IS INCONSISTENT**, RANGING FROM -12.3% IN FEBRUARY TO +15.0% IN MARCH.
- **RECENT DECLINE**: THERE ARE ALARMING DOWNWARD TRENDS IN NOVEMBER (-1.7%) AND DECEMBER (-0.5%).
- **RECOVERY PATTERN**: OCTOBER SHOWED POSITIVE GROWTH (5.4%) AFTER NEGATIVE AUGUST-SEPTEMBER PERIOD

8. CRITICAL ISSUES

- **HIGH CANCELLATION RATE**: 11K CANCELLED RIDES BY REGULAR RIDERS INDICATES SERVICE OR MATCHING PROBLEMS
- **LOST BOOKINGS**: 57K REPRESENTS MASSIVE OPPORTUNITY COST AND COMPETITIVE VULNERABILITY
- **DRIVER-RELATED CANCELLATIONS**: "MORE THAN PERMITTED PEOPLE" AND DRIVER-SIDE ISSUES NEED POLICY ENFORCEMENT
- **DATA QUALITY**: 29,942 BLANK CANCELLATION REASONS SUGGEST INCOMPLETE TRACKING OR REPORTING GAPS

STRATEGIC RECOMMENDATIONS

Uber

REVENUE RECOVERY & GROWTH

- **REDUCE LOST BOOKINGS:** IMPLEMENT SURGE PRICING OPTIMIZATION AND DRIVER INCENTIVES DURING PEAK HOURS TO CAPTURE THE 57K LOST BOOKINGS (POTENTIAL 38% REVENUE INCREASE)
- **DYNAMIC PRICING STRATEGY:** ADJUST FARE STRUCTURES DURING LOW-DEMAND MONTHS (FEB, AUG, NOV, DEC) TO STABILIZE REVENUE FLUCTUATIONS
- **PREMIUM VEHICLE UTILIZATION:** LAUNCH TARGETED PROMOTIONS FOR PREMIER SEDAN AND UBER XL TO IMPROVE THEIR CURRENTLY LOW BOOKING RATES

STRATEGIC RECOMMENDATIONS

Uber

EFFECTIVENESS OF OPERATIONS

- **PROGRAM FOR REDUCING CANCELLATIONS:** IMPROVE DRIVER-RIDER MATCHING ALGORITHMS AND PENALTY STRUCTURES TO ADDRESS THE 37K CANCELLED RIDES.
- **ENHANCEMENT OF DATA QUALITY:** IMPLEMENTING MANDATORY REASON SELECTION AT CANCELLATION WILL ADDRESS THE 29,942 BLANK CANCELLATION ENTRIES.
- **MANAGEMENT OF DRIVER CAPACITY:** DURING PEAK EVENING HOURS (6–9 PM), WHEN DEMAND REGULARLY SURPASSES 4,500 RIDES, ADD MORE DRIVERS.

STRATEGIC RECOMMENDATIONS

Uber

IMPROVEMENT OF THE CUSTOMER EXPERIENCE

- **ENHANCEMENT OF DRIVER PERFORMANCE:** CLOSE THE RATING GAP BETWEEN DRIVER RATINGS (4.23) AND CUSTOMER SATISFACTION (4.40) BY IMPLEMENTING QUALITY INCENTIVES AND TRAINING INITIATIVES.
- **RETENTION OF NEW CUSTOMERS:** CREATE PROMOTIONAL OFFERS AND ONBOARDING PROGRAMS TO TURN NEW RIDERS INTO LOYAL PATRONS.
- **FREQUENT RIDER LOYALTY INITIATIVES:** TO REDUCE ATTRITION, IMPLEMENT A REWARDS PROGRAM FOR THE HIGH-VALUE REGULAR RIDER SEGMENT.

STRATEGIC RECOMMENDATIONS

Uber

GEOGRAPHICAL OPTIMIZATION

- **STRATEGIC PLACEMENT:** DURING PEAK HOURS, PLACE MORE CARS CLOSE TO THE BEST PICKUP LOCATIONS (KHANDSA, BARAKHAMB, SAKET).
- **OPTIMIZING CORRIDORS:** ESTABLISH DEDICATED ROUTES BETWEEN PAIRS OF PICKUPS AND DROPS THAT RECEIVE A LOT OF TRAFFIC, LIKE KHANDSA TO ASHRAM.
- **POSSIBILITIES FOR EXPANSION:** EXAMINE UNDERSERVED REGIONS AND THINK ABOUT EXTENDING SERVICES TO REACH NEW MARKETS.

STRATEGIC RECOMMENDATIONS

PAYMENT & TECHNOLOGY

- **DIGITAL PAYMENT ADOPTION:** INCENTIVIZE UPI AND WALLET USAGE (ALREADY 44% OF REVENUE) TO REDUCE CASH HANDLING COSTS AND IMPROVE TRANSACTION SPEED
- **APP IMPROVEMENTS:** ENHANCE REAL-TIME TRACKING AND ETA ACCURACY TO REDUCE CUSTOMER-INITIATED CANCELLATIONS (6,835 CASES)
- **PREDICTIVE ANALYTICS:** IMPLEMENT AI-DRIVEN DEMAND FORECASTING TO OPTIMIZE DRIVER ALLOCATION

STRATEGIC RECOMMENDATIONS

Uber

FLEET MANAGEMENT OF VEHICLES

- **FOCUS ON CARS AND BIKES:** EXPAND THE SUCCESSFUL AUTO (23,128 BOOKINGS) AND BIKE (20,560 BOOKINGS) MARKETS.
- **REBALANCING THE FLEET:** REDUCE THE NUMBER OF UNDERUTILIZED LUXURY CARS OR MOVE THEM TO AFFLUENT NEIGHBORHOODS.
- **MATCHING VEHICLE LOCATIONS:** BASED ON DISTANCE AND FARE TRENDS, MATCH VEHICLE TYPES TO PARTICULAR LOCATION REQUIREMENTS.

STRATEGIC RECOMMENDATIONS

Uber

TREND AND SEASONAL MANAGEMENT

- **HANDLE VOLATILITY** BY LOOKING INTO THE UNDERLYING REASONS FOR SHARP MONTHLY FLUCTUATIONS (-12.3% TO +15.0%) AND PUTTING STABILIZING MEASURES IN PLACE.
- **WINTER STRATEGY:** CREATE FOCUSED INITIATIVES TO STOP THE DECLINING GROWTH TREND FROM NOVEMBER TO DECEMBER.
- **COMPETITOR ANALYSIS:** DETERMINE COMPETITIVE THREATS BY EVALUATING CHANGES IN MARKET SHARE DURING MONTHS WITH NEGATIVE GROWTH.

STRATEGIC RECOMMENDATIONS

Uber

QUALITY CONTROL & COMPLIANCE

- **POLICY ENFORCEMENT:** STRICTLY ENFORCE PASSENGER LIMITS TO ADDRESS "MORE THAN PERMITTED PEOPLE" CANCELLATIONS
- **DRIVER VERIFICATION:** IMPLEMENT REAL-TIME MONITORING TO PREVENT DRIVER-SIDE CANCELLATION ISSUES
- **SERVICE LEVEL AGREEMENTS:** ESTABLISH AND MONITOR SLAS FOR WAIT TIMES, CANCELLATION RATES, AND CUSTOMER SATISFACTION

EXPECTED IMPACT

IMPLEMENTATION PRIORITY

- 50% FEWER LOST RESERVATIONS EQUALS A POSSIBLE 19% INCREASE IN REVENUE.
- 30% FEWER CANCELLATIONS = 11K MORE RIDES COMPLETED.
- BOOST CUSTOMER LOYALTY AND RETENTION BY RAISING DRIVER RATINGS TO 4.40 OR HIGHER.
- MAINTAIN A STEADY MONTHLY GROWTH RATE OF 3-7% FOR A PREDICTABLE REVENUE TRAJECTORY.

- **IMMEDIATE (0-3 MONTHS):** RESOLVE CANCELLATIONS, CLOSE DATA GAPS, AND MAXIMIZE CAPACITY DURING PEAK HOURS
- **SHORT-TERM (3-6 MONTHS):** EXPAND DIGITAL PAYMENTS, ENHANCE DRIVER RATINGS, AND INTRODUCE LOYALTY PROGRAMS
- **LONG-TERM (6-12 MONTHS):** IMPLEMENTING ADVANCED ANALYTICS, FLEET OPTIMIZATION, AND STRATEGIC EXPANSION
